

Improving patient outcomes with instant 24*7 care at home

India has 10X less specialist doctors*- Overburdened with no time and resources for outpatients

*EY report and Fortune business insights, 2022

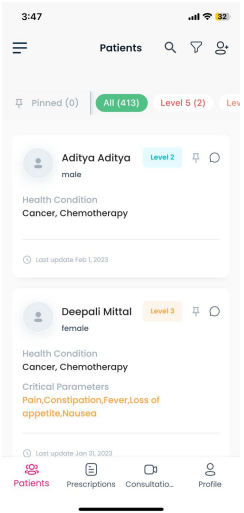

Patients have no easy access to medical care at home

1. **Endless questions** related to symptoms, nutrition, reports, medications etc etc.
2. **Long waiting time** to get the relevant help
3. **Poor patient outcomes** due to non timely interventions

Conversational AI chatbot for patients that gives them holistic care instantly and monitored remotely through their doctors
