CIGA

Continuous Intelligence Generation and Alerting

Real-time mission-ready intelligence

When Minutes Matter: Intelligence Failures

Threats move in hours.

Analysis takes days.

80%

of analyst time wasted searching, not analyzing

By the time analysis is complete, it's too late.

Why Analysts Can't Keep Up

Fragmented Tools, Infrastructure Dependencies

Result: Intelligence expires before it's delivered

By the time analysis is complete, threats have evolved

Intelligence Community Validation

COMMERCIAL CUSTOMER

Kevin Higgins

Former CIA Chief of Staff
CEO, KSTK Enterprises

60% productivity lift

GOVERNMENT ADVISOR

Sean Batir

CTO, Project Maven (NGA)
DoD/IC AI Program

BD ADVISOR

Howard Levenson

Built Databricks Federal

Commercial validation with government expertise opens federal doors

Experienced Leadership

Anantha Bangalore

Chief Executive Officer

25+ years AI, blockchain, cybersecurity

Co-founder Percipient.ai • Multiple successful exits

Top Secret

Dimitry Dukhovny

Chief Operations Officer

Intelligence & DoD operations specialist

Tech/security programs for startups to large corps

Top Secret

Gracie Carter

Chief Product Officer

10+ years AI and data-driven products

NLP and healthcare informatics expertise

Dr. Sunondo Ghosh

Chief Technology Officer

Multiple startup successes in scalable AI/ML

Commercial and National Security sectors

Team Advantage

Proven collaboration • 50% hold Top Secret clearance • Multiple exits in AI, blockchain, cybersecurity

Reactive vs Continuous Intelligence (Use Case)

Nuclear Supply Chain Monitoring

Iran Uranium Procurement Case Study

Episodic Investigation

React after procurement detected

1. **INCIDENT** — Uranium shipment intercepted
2. **INVESTIGATE** — Trace shell company networks
3. **ANALYZE** — Map procurement pathways
4. **REPORT** — Submit to sanctions committee

NETWORK ADAPTS

VS

AI AGENTS WORKING 24/7

Continuous Intelligence

Monitor procurement indicators

- **MONITOR** — Track dual-use material suppliers
- **CONNECT** — AI links entities to Iranian fronts
- **LEARN** — Identify procurement signatures
- **PREDICT** — Alert before materials ship

SUPPLY CHAIN DISRUPTED

Continuous Intelligence: Reasoning You Can Trust

AI Agents Orchestrate

Automated workflow across all data sources

Evidence Chain

Every claim traceable to source

Operator Ready

Deploy in days, run anywhere

Continuous Context

Intelligence persists across systems and missions

Core Technology: KGOT + Evidence Reuse

Knowledge Graph of Thought
captures reasoning pathways, not just answers

Evidence Reuse Flywheel
each analysis makes the next one faster

Dynamic Model Selection
cloud LLMs or edge SLMs based on mission

AI Agents Connect the Dots
automatically chase leads and correlate findings

Competition

PLATFORM	DEPLOYMENT	TIME TO VALUE	OPERATOR REQUIREMENTS	USE CASE
CIGA	✓ Days	✓ Hours	✓ Single operator	**Continuous tactical intel**
Palantir	✗ 6+ months	✗ Months	✗ Dedicated team	Enterprise data integration
C3.ai	✗ 3-6 months	✗ Months	✗ Technical team	Enterprise AI platform
YURTS	△ Weeks	△ Days	△ Technical user	Research & analysis
Sayari	✓ Days	△ Days	△ Analyst team	Entity resolution

"We're built for when minutes matter."

Market: Where Continuous Intelligence Meets Urgency

$12B+ Market Opportunity

Growth Trajectory

12-Month Targets

3	2	$5M	$1-2M
GOV CONTRACTS	COMMERCIAL POCS	PIPELINE	ARR TARGET

3-Year Annual Revenue

$12M

Go-to-Market

Same workflow problem, different procurement cycles

Government Path

- → SBIR/DIU/OTA vehicles
- → 6-month cycles
- → Building past performance
- → Army, Navy, Air Force, DIA, NGA - all need this

Commercial Path

- → Former IC professionals, commercial applications
- → Kevin (former CIA) is the prototype
- → 60-day proof of value
- → Fast contracting cycles

Active Government Pipeline

DIU Situational Awareness	Pathfinder (OSD)	Army xTech Challenge
Air Force Cognitive Warfare	AFWERX Phase 2	Army Futures Command

2Q.ai: SEED ROUND

$3M

SAFE · Valuation Cap: $20M · Discount: 20%

Product Development	60%
Sales & Marketing	25%
Operations	15%

CIGA

Real-time mission-ready intelligence

Appendix

CIGA: Secure Architecture

Small Footprint, Containers on Commodity Hardware, Huge Impact

Deployment Flexibility

- Containerized deployment for classified environments
- Support for open-source LLMs (Llama, etc.)
- Air-gapped operation capability
- Flexible hosting options (on-prem, cloud, hybrid)
- integration of custom ontologies and knowledge graphs

Security & Compliance

- End-to-end audit trails of all agent actions
- Comprehensive logging of decision paths
- Role-based access controls
- Zero trust architecture principles

Transparency and Control

- Full visibility into agent orchestration logic
- Configurable validation checkpoints
- Human-in-the-loop oversight options
